

ONE AT A TIME

A physics teacher in high school, once told the students while one grasshopper on the railroad tracks wouldn't slow a train very much, a billion of them would. With that thought in mind, read the following, obviously written by a good American.....

This probably sounds crazy, but just yesterday I was in Wal-Mart looking for a wastebasket. I found some made in China for \$6.99. I didn't want to pay that much so I asked the lady if they had any others. She took me to another department and they had some at \$2.50 made in the USA. They are just as good.

Same as a kitchen rug I needed. I had to look, but I found some made in the USA and they were \$3.00 cheaper. We are being brain washed that everything that comes from China and Mexico is cheaper. Not so. That is also why I don't buy cards at Hallmark anymore. They are made in China and are expensive. I buy them at Dollar Tree.....\$.50 cents each and made in the USA.

Check this out. I can verify this because I was in Lowe's the other day for some reason and just for the heck of it I was looking at the hose attachments. They were all made in China. The next day I was in Ace Hardware and just for the heck of it I checked the hose attachments there. They were made in USA. Star looking.....

In our current economic situation, every little thing we buy or do affects someone else-even their job. So, after reading this message, I think this lady is on the right track. Let's get behind her!

My grandson likes Hershey's candy. I noticed, though, that it is marked made in Mexico now. I do not buy it anymore.

My favorite toothpaste Colgate is made in Mexico....now I have switched to Crest. You have to read the labels on everything. Good idea...one light bulb at a time....

This past weekend I was at Kroger. I needed a 60W light bulb and Bounce dryer sheets. I was in the light bulb aisle, and right next to the GE brand I normally buy was an off-brand labeled, "Everyday Value". I picked up both types of bulbs and compared the stats they were the same except for the price. The GE bulbs were more money than the Everyday Value brand but the thing that surprised me the most was that the GE brand was made in Mexico and the Everyday Value brand was made in – get ready for this- the USA in a company in Cleveland, Ohio.

So throw out the myth that you cannot find products you use every day that are made right here.

So on to another aisle. Bounce dryer sheets, yep, you guessed it, Bounce cost more money and is made in Canada. The Everyday Value brand was less money and MADE IN THE USA! I did laundry yesterday and the dryer sheets performed just like the Bounce free I have been using for years and at almost half the price.

My challenge to you is to start reading the labels when you shop for everyday things and see what you can find that is made in the USA. The job you save may be your own or your neighbors.

If you accept the challenge, pass this on to others in your address book so we can all start buying American, one light bulb at a time! Stop buying from overseas companies! (We should have awakened a decade ago....)

Let's get with the program and help our fellow Americans keep their jobs and create more jobs here in the USA.

I passed this on.....Will you?
